

YOUR GO TO DATA PLATFORM

BonData is the Smart Harmonization Layer for data-driven organizations. We resolve the "Data Debt" created by fragmented systems and disconnected silos, making high-integrity data instantly accessible without the need for manual engineering or a "rip and replace" of your existing stack.

BonData provides an autonomous overlay that maps and correlates your entire ecosystem within 24 hours. By automating **Data Harmonization**, we bridge the gap between messy operational data and business-ready insights. Whether your goal is to establish a definitive **Golden Record**, automate complex cross-system reporting, or ensure immediate **AI Readiness**, BonData provides the unified foundation you need.

Why BonData?

BonData is a Smart Harmonization Layer that resolves the data debt of fragmented systems without a "rip-and-replace." By autonomously correlating your ecosystem, we establish a definitive Golden Record and ensure AI-readiness. We eliminate manual data cleaning, providing a single source of truth that empowers teams to act with absolute confidence.

Advantages

Time to Value

Unlike months-long digital transformations, BonData's autonomous overlay maps your ecosystem in 24 hours. You identify bottlenecks and see results immediately, bypassing the long wait times and high costs of traditional consultancy projects.

Trusted Data

Stop relying on manually cleaning and reconciling data. BonData resolves your "Data Debt" by automating harmonization across all silos. You get reliable, high-quality information that eliminates guesswork and restores confidence in your reporting.

Context & AI

Dirty data is the primary barrier to AI. We provide the semantic context needed to turn fragmented systems into a high-integrity foundation. We make your business AI-ready today, ensuring your automation and predictive tools are built on precision.

Golden Record

Establish a single, definitive version of the truth for your core entities - like products, suppliers, or assets. We create this Golden Record without a "rip-and-replace" overhaul, providing a unified view of your business that stays accurate in real-time.

How it Works

CONNECT

Connect to your legacy TMS, ERP, and "dirty" sources (PDFs/EDI/Excel).

HARMONIZE

The IntelliBond engine automatically resolves entities (e.g., mapping Carrier-A's ID to your Shipment ID).

ACT

Interrogate your data via BonData Chat or trigger workflows for "Total Landed Cost" alerts.
